

VeriAI Synthetic Candidate

DEMO PROFILE | Not a real person | Generated for product validation

PROFILE

Computer Science student with project experience across backend APIs, web applications, databases, cloud deployment, and collaborative engineering workflows.

SKILLS

Python	FastAPI	PostgreSQL	Docker
React	TypeScript	AWS	Git

PROJECTS

Campus Placement Intelligence Platform

Built an API-driven workflow to structure candidate evidence, rank profiles against job requirements, and expose explainable skill matches for placement teams.

Developer Activity Dashboard

Aggregated repository and coding-practice signals into normalized performance metrics with resilient external API handling.

EXPERIENCE

Software Engineering Intern

Delivered tested backend features, documented decisions, and improved reliability through validation and observable error handling.

EDUCATION

Bachelor of Technology, Computer Science | Synthetic academic record for demo use

This document is intentionally synthetic. It contains no personal data and exists only to demonstrate VeriAI resume preview and matching workflows.
